                                                                                                                                                                                                                                                                                                                                                                                                                                US-UB-733-825-3

US-UB-733-825-3

Paceuence 3. Application US/08733825

Patent No. 537839

GENERAL INFORMATION:

APPLICANT: Huwyler, Leslie R.

TITLE OF INVENTION: Coding Sequences for Mevalonate TITLE OF INVENTION: Coding Sequences for Mevalonate TITLE OF INVENTION: Coding Sequences for Mevalonate TITLE OF INVENTION: Pyrophosphate Decarboxylase CORRESPONDENCE ADDRESS:

ADDRESSEE: No. 5837839artis Patent and Trademark Department STREET: S9 Route 10

CITY: East Hanover STATE: New Jersey

COUNTRY: USA

ZIP: O1936-1080

COMPUTER READBLE FORM:
MEDIUM TYPE: Ploppy disk

COUNTRY: USA

ZIP: O7936-1080

CONTRY: USA

ZIP: No. 58378394: DC. DOS/MS-DOS

OFERATING SYSTEM: US/O8/733,825

FILING DATE: PatentIn Release #1.0, Version #1.30

CURSIFICATION NUMBER: US 60/005,652

PILING DATE: 18-COT-1995

ATTORNEY AGENT INFORMATION:

NAME: NO. 58378394k, Henry P.

REGISTRATION NUMBER: 33200

REFERENCE/DOCKET NUMBER: 33200

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       COMPUTER RELAMBLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IEB PC compatible
COMPUTER: IEB PC compatible
CORPERTING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PatentIn Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/487,890A
CLASSIFICATION ADATA:
APPLICATION NUMBER: US 08/175,116
FILING DATE: 29-DEC-1993
PRIOR APPLICATION DATA:
APPLICATION NUMBER: US 08/175,116
FILING DATE: 08-NOV-1993
ATTORNEY/AGENT INFORMATION:
REGISTRATION NUMBER: US 08/148,968
FILING DATE: 08-NOV-1993
ATTORNEY/AGENT INFORMATION:
NAME: Stewart, Michael I
REGISTRATION NUMBER: 24-973
REFERENCE/MOCKET NUMBER: 1038-466 MIS:jb
TELEPHONE: (416) 555-1155
APPLICANT: Gray-Owen, Scott
APPLICANT: Yang, Yan-Fing
APPLICANT: Murdin, Andrew
APPLICANT: Michi, Michel
TITLE OF INVENTION: Transferrin Receptor Genes
NUMBER OF SEQUENCES: 147
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sim & McGurney
STREET: 6th Floor, 330 Unviersity Avenue
CITY: Tronto
STATE: Ontario
COUNTRY: Canada
ZIP: MG IR7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SOFTWARE: Patentin Release #1.0, Version #1.25
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          95.0%; Score 19; DB 1; 100.0%; Pred. TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPBUTICS

TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPBUTICS

FILE REFERENCE: 107096.136

CURRENT PAPLICATION NUMBER: US/09/252, 991A

CURRENT FILING DATE: 1999-02-18

PRIOR FILING DATE: 1999-02-18

PRIOR FILING DATE: 1999-07-27

NUMBER OF SEQ ID NOS: 33142

LENGTH: 122
                                                                                               Sequence 9915, Application US/09489039A

Patent No. 6610836

GENERAL INFORMATION:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 4222, Application US/09134000C

Batent No. 6617156

GENERAL INFORMATION:

TITLE OF INVENTION: UNCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO

TITLE OF INVENTION: ENTERCOCCCUS FAECALIS FOR DIAGNOSTICS AND THERAPEUTICS

TITLE OF ILLING DATE: 1039-08-13

CURRENT APPLICATION NUMBER: US/09/134,000C

CURRENT APPLICATION NUMBER: US/09/134,000C

PRIOR APPLICATION NUMBER: US 60/055,778

PRIOR PILING DATE: 1997-08-15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  .;

Patent No. 585865
GENERAL INFORMATION:
APPLICANT: Arnold, Andrew
TITLE OF INVENTION:
PRADI Cyclin and its CDNA
NUMBER OF SEQUENCES: 8
CORRESPONDENCE ADDRESS:
ADDRESSEE: STERNE, KESSLER, GOLUSTEIN & FOX P.L.L.C.
STREET: 1100 New York Avenue, N.W., Suite 600
CITY: Washington
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  MEDIUM TYPE: FLORDY disk
COMPUTER: IBM PC compatible
COMPUTER: IBM PC compatible
COMPUTER: IBM PC compatible
COPERATING SYSTEM: PC-DOS/NS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/460,694
FILING DATE: 02-JUN-1995
CLASSIFICATION: 435
ATTORNEY/AGRNT INFORMATION:
NAME: MCCONALHY, Evelyn H.
REGISTRATION NUMBER: 35,279
REFRENCE/DOCKET NUMBER: 0609.4070002
TELEPHONIS: 202-371-2640
TELEPHONE: 202-371-2640
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 3, Application US/08460744

GENERAL INFORMATION:

APPLICANT: Marc J. Rubenfield et al.

TITLE OF INVENTION: AERUGINCSA FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 107196.136

CURRENT APPLICATION NUMBER: US 60/074,788

PRIOR APPLICATION NUMBER: US 60/074,788

PRIOR APPLICATION NUMBER: US 60/094,190

PRIOR FILING DATE: 1998-02-18

PRIOR FILING DATE: 1998-02-18

PRIOR FILING DATE: 1998-02-18

SEQ ID NOS: 33142

LENGTH: 156
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö

Patent No. 644425

GENERAL INFORMATION:
APPLICANT: Reed, Eaven G.
APPLICANT: Lodes, Michael J.
APPLICANT: Mohamath, Roadoh
APPLICANT: Georiet, Heather
TILLE OF INVENTION: COMPOUNDS FOR THERRY AND DIAGNOSIS OF
TITLE OF INVENTION: LUNG CANDER AND METHODS FOR THEIR USE
TITLE OF INVENTION: LUNG CANDER AND METHODS FOR THEIR USE
TITLE OF INVENTION: LUNG CANDER AND METHODS FOR THEIR USE
FILE REPRENCE: 210121 475C1
CURRENT APPLICATION NUMBER: US/09/370,938
CURRENT FILING DATE: 1999-08-09
EARLIER PILING DATE: 1999-04-02
NUMBER OF SEQ ID NOS: 289
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 203
LENGTH: 164
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Length 164;

Sequence 6739, Application US/09328352

Retent No. 6562958

GENERAL INFORMATION:
APPLICANT; GATY L. Breton et al.
APPLICANT; GATY L. Breton et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER
TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
CURRENT APPLICATION NUMBER: US/09/328,352
CURRENT FILING DATE: 1999-06-04
NUMBER OF SEQ ID NOS: 8252
LENGTH: 180
                                                                                                                                                                                      Gaps

Batent No. 6605709

GENERAL INFORMATION:
APPLICANT: GARY BRETON

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PROTEUS MIRABIL
TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 2709 1002-001

CURRENT APPLICATION NUMBER: US 60/128,706

PRIOR APPLICATION NUMBER: US 60/128,706

PRIOR APPLICATION NUMBER: US 60/128,706

NUMBER OF SEQ ID NOS: 8344

SEQ ID NO 7333

LENGTH: 189
                                                                                  Sequence 24341, Application US/09252991A
Patent No. 6551795
GENERAL INPORMATION:
TITLE OF INVENTION: MUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: AERGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
CURRENT APPLICATION NUMBER: US/09/252,991A

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being prin and is derived by analysis of the total score distribution.

Sequence 62, Application US/09171432A
Publication No. US20030187184A1
GENERAL INFORMATION:
APPLICANT: Fields, Howard A.
APPLICANT: Khudyakov, Yury E.
TITLE OF INVENTION: Antigenically Reactive Regions of the
TITLE OF INVENTION: Hepatitis A Virus Polyprotein
NUMBER OF SEQUENCES: 88
CORRESSEDE: Kilpatick Stockton LLP
STREET: 3424 Peachtree Road, N.E.
CITY: Arlanta
STRYE: Georgia
COUNTRY: USA
ZIP: Alanta
STRYE: Peoply disk
COMPUTER: IBAP Compatible
CONTRY: USA
ZIP: PatentIn Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/171,432A
FILING DATE: 23-NOV-1998
CLASSIFICATION:
ATTORNEY/AGENT INPORMATION:
REGISTRATION NUMBER: US/09/171,432A
